

SKILL[®]

Surgical Instruments

VASCULAR MICRO SURGERY INSTRUMENTS

SKILL® The World's Best Surgical Instruments

All **SKILL®** Instruments are manufactured on a three-pillar principle, namely raw material quality, skilled craftsmanship as well as precise and validated heat treatment and tempering.

Our goal is achieved by using German Forgings and German Steel for the production of our **SKILL®** Instruments. Using only German Craftsmanship, engineering and know-how throughout the manufacturing process along with the validated heat treatment is a necessity in the production of our **SKILL®** Instruments.

SKILL® Instruments are manufactured in Germany according to the EU Directive 93/42/EWG, as well as the following ISO Standards;

ISO: 9001

ISO:13458

ISO: 7153-1

No compromise is made on the quality of a **SKILL®** Surgical Instrument.

The **SKILL®** short chain of supply allows clients to purchase the highest quality of Instrument at the most competitive pricing.

SKILL® Instruments offer the Surgeon a heightened sense of Instrument control allowing the Surgeon to greatly reduce the trauma and risk associated with Surgery.

OPERATE WITH SKILL®, OPERATE WITH US.

SKILL® Instruments carry a Lifetime warranty which covers any material defect or faulty manufacturing.

SKILL® Instruments will be repaired or replaced free of charge without compromise to the product in the event of a valid claim.

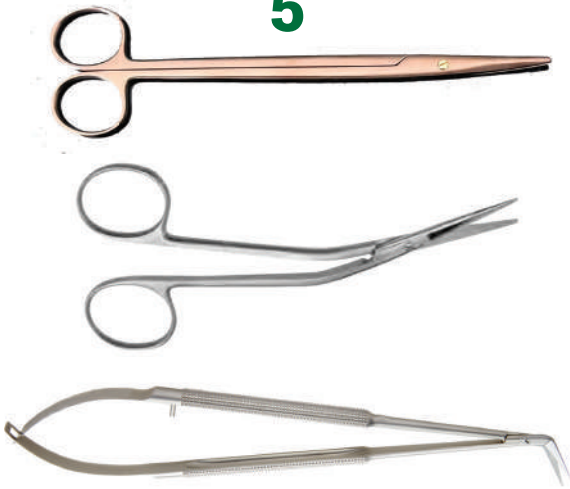

SKILL® Instruments are to be returned to the authorised distributor for maintenance, any work carried out by an unauthorised person will void the warranty.

No part of the Catalogue may be copied, forwarded or distributed without the express written consent given by the Manufacturer or its Distributor.

Operate with **SKILL®**

Supercut Scissors

- SUPERCUT Scissors have one razor blade which allows an easy and clean cut.
- The micro serration at the opposite blade prevents sliding off the tissue.

Characteristic: Golden Screw

Supercut Titanium-Nitrite Scissors

Scissors with **SUPERCUT TITANIUM-NITRITE** have one razor blade which allows an easy and clean cut through tissue. **TITANIUM NITRITE** coatings:

- The glide quality of the instruments is considerably improved by electrophysical smoothing, resulting in less abrasion and reduced wear.
- The exceptional smoothness means that the scissor blades slide easily, even under maximum stress.
- The smooth surface makes the scissors much easier to clean.
- The coating makes the surface three to five times harder. This multiplies the lifetime of the cutting edges and makes the instruments extremely resistant to scratches and impacts.
- The coating is largely inert, which means that the molecular binding is very chemically resistant. This prevents undesirable reactions when the instruments are immersed in solutions or sterilised.
- Even under intensive use of acid or alkaline solutions, the high level of surface smoothness is retained.
- The inert coating is also stable at high temperatures.

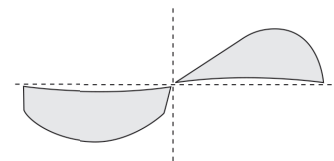

Characteristics of TIN - coatings:

- 3-5 Times harder than hardened steel.
- Smooth, impervious, ceramic material structure.
- High-grade surface finish, reduced reflection.
- Anti-corrosive, easy to clean surface.
- Far more resistant to solvents and aggressive fluids than uncoated steel.
- Scratch-resistant.
- Temperature-resistant.
- High level of adherence.
- Low friction.

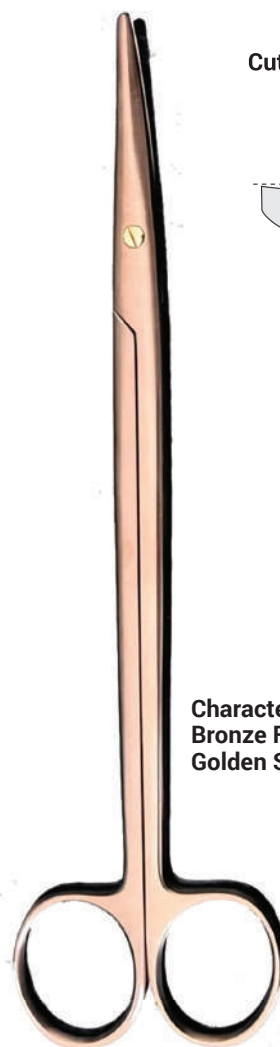

Characteristic:
Black Finish,
Golden Screw

SPECIALITY INSTRUMENTS

A detailed microscopic image showing numerous red blood cells (erythrocytes) and one larger white blood cell (leukocyte) with a prominent nucleus. The cells are illuminated with a warm, orange-red light, creating a sense of depth and texture. The red blood cells are biconcave and appear as bright, circular structures, while the white blood cell is larger and more irregularly shaped with a darker, textured interior.
